

The Problem:

Dirty, neglected power steering fluid can: Cause noise and increased steering effort. Reduce steering effectiveness. Harden seals and cause leakage, leading to wear. Cause expensive repairs of power steering components. such as the power steering rack-and-pinion, which can cost as much as \$1,000 to replace.

Briganti's Power Steering System Flush Service helps provide the steering response you expect from your vehicle. Keep your vehicle safe and reliable with a complete Briganti's Power Steering System Flush Service.

The Solution:

Briganti's Power Steering System Flush Service: Removes the old fluid from the reservoir. Vacuum flushes the entire system with a proprietary product formulated to loosen and remove sludge and other contaminants from the system. Refills the system with the correct manufacturer recommended fluid. Restores steering performance.

1. Helps prevent sluggish steering on cold mornings.
2. Reduces or eliminates steering noise.
3. Provides proper lubrication of power steering components.
4. Helps avoid premature, unexpected and expensive steering system failures.

For safety and the life of your vehicle, make sure power steering service is part of your normal maintenance schedule. With Briganti's, you've got over 60 years of auto-care experience ready to help you avoid breakdowns and other expenses.

Can You See A Difference?

Fresh power steering fluid is clean and clear. Dirty, neglected power steering fluid can look like used engine oil and can compromise the performance of your steering system, and in some cases, even cause damage. If you haven't serviced your power steering system lately,

now's the time to do something about it.
